I can identify parts of an expression using mathematical terms and view one or more parts of an expression as a single entity.

Circle the sum, difference, product or quotient; underline the term; and draw a star over the coefficient.

1.	$7w + 22 = 109$	2	$5 + a = 12$	3	$(5 + n) - 3 = 7$
4	$6y - 25 = 125$	5	$27 - g = 45$	6	$(7 + 20) - x = 14$
7	$(3 + x) * 3 = 9$	8	$42m - 7 = 91$	9	$12n - 4 = 68$
10	$14s * 3 = 84$	11	$(7f * 3) \div 2 = 42$	12	$16k + 3 = 99$
